Pet Twin

Pet Twin is an alternative and electronic project led by James Gallagher, singer in GTI alumni Juniper Nights. They like to soak their songs in melancholy and draw inspiration from the darker, more vulnerable parts of themselves, and this set will showcase a recently convened permanent band. Expect melody, intensity, inventive projections, and crow shoulder pads.

Chrysalid Homo

And if that sounds pleasingly theatrical, we'll be welcoming Salford's Chrysalid Homo, self-styled "practitioners of post-nuclear electronic music". My Vinyl Dreams' review of their *Insanus et Humatica* album references Giorgio Moroder, Bill Nelson, Throbbing Gristle, Add N to (X), Goldfrapp, Kraftwerk, Devo, and Italo disco, which is surely enough to get the salivatory glands flowing.

Baby Maker

Brought kicking and screaming into this world by brothers R. Kester & N. Kester (Oxford/ Reading), Baby Maker cherry pick and prod at the carcass of influence, looking to rip off the best of what remains ripe and ready, and meld it into the latest musical designer dog. What does that mean? It means quirky and occasionally menacing pop, that's what it means.
