O Moon

This will be one of our more relaxed gigs, and O Moon are a laid-back, groovy and jazzy indie three-piece with a tendency for catchy melodies and fat vocal harmonies. If you like funky and unpredictable tunes with three different frontmen (all with separate musical ideas!) they're the guys for you. Although this gig happens in the chill of February, O Moon will bring some warm breaths of summer into the room.

<http://www.soundcloud.com/omoonband>

Asteroid Lily

Formed in London in 2023, Asteroid Lily are the musical lovechild of Swedish singer-songwriter and lyricist Jo, and Greek music producer/synth player Spiros Maus. The band draws inspiration from an array of musical styles, seamlessly fusing the ethereal synths of Röyksopp, the grandiosity of musical theatre, the catchy pop hooks of ABBA, and the intricate beauty of classical music, but in short they make tuneful synth pop like mama used to make

<http://asteroid-lily.supertape.site>

The Cloud

31hours have long been a favourite of ours, having played for us back in the Wheatsheaf days, and on the main stage at our first In A Different Place all-dayer in 2023. Now Jo Griffin is back in the guise of The Cloud, a glitchy but dreamy synth and guitar act, Take a listen to 'Friday 22nd' on the link below, to experience some ghostly waif pop somewhere between Radiohead, gospel, and Boards of Canada.
